

MultiRATE Press Release [April 3, 2025]

MultiRATE Participates in the LAGO Project's Final Workshop

Showcasing the Holistic Readiness Level Web Calculator and Advancing EU Security Research Collaboration

Figure 1: MultiRATE Coordinator presenting the Holistic Readiness Level (HRL) Web Calculator at the LAGO Final Workshop

MultiRATE was honored to take part in the Final Workshop of the LAGO Project, an event that brought together a vibrant cross-section of the EU security research community including law enforcement agencies, policymakers, industry representatives, and academic researchers. The event served as a platform for dynamic discussion and knowledge exchange on key security and interoperability challenges in Europe.

During the workshop, the MultiRATE Project Coordinator showcased the Holistic Readiness Level (HRL) web calculator, an innovative evaluation framework designed to assess the maturity and alignment of

security-related project outcomes. In particular, the presentation focused on how HRL was used to evaluate the key outcomes of the LAGO project, that is specific tools developed and deployed throughout the project lifecycle. Additionally, a presentation on the results extracted from the HRL web calculator discussed with LAGO's Consortium and Project Officer providing explanations for improvement of the evaluated tools in the forthcoming future. The session featured demonstration of the HRL's structure and visualization capabilities, underlining its potential as a valuable instrument in measuring progress and fostering alignment with broader strategic objectives in security research.

The LAGO Project's final workshop highlighted the importance of collaborative innovation and knowledge sharing in shaping the future of secure and interoperable research ecosystems. MultiRATE extends its appreciation to the LAGO consortium for organizing such an impactful event and for encouraging cross-sector collaboration.

The knowledge, connections, and insights gained through this event will continue to support MultiRATE's mission of building interoperable, secure, and sustainable data ecosystems for EU security research.
